EXAMINER'S AMENDMENT

1. The examiner noticed that there are repetitive claims in the application that were previously depended on claim 2. Claim 2 is presently cancelled. Hence, the examiner is canceling reoccurring claims 13, 15, 17 and 19.

The application has been amended as follows:

Please cancel claims 13, 15, 17 and 19.

Allowable Subject Matter

2. Claims 1, 4-12 are allowed and re-numbered as 1-10.
3. The following is an examiner's statement of reasons for allowance:

The instant invention defines a method for restoring a three-dimensional image representing the surface contours of at least one object, based on at least one two-dimensional X-ray projection of this object. The prior art of record fails to teach determining the position of the shooting source in a reference referential system; selecting at least one statistical model defining an average shape of the object and its main deformations with respect to this average shape, the statistical model being calculated from an object population of a same type for which the statistical correspondence common to all objects is searched; and selecting an orientation and a position of the model in the reference referential system by submitting the statistical model, successively, to a rigid transformation modifying its position and/or its orientation, then selecting a deformation of the model to modify its contours in three dimensions, by submitting the statistical model to a non-rigid deformation modifying its surface contours, wherein the orientation and deformation selecting steps are performed iteratively until the contours of the model are such that the intervals between back-projection rays of the image contours in two dimensions from the source and the model surface are minimum, in order to obtain a correspondence between the model and

the image. These elements in combination with all of the other elements of the claims are not taught or fairly suggested in the prior art of record. The dependent claims are allowed for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
